Dear Industry Friend:

The Mid Atlantic Construction Safety Council is a group of like-minded construction safety professionals dedicated to the protection of life and property in the construction industry. Our efforts are directed towards, but not limited to: sharing safety information for our mutual benefit, fostering safety awareness, standardizing safety practices, encouraging cooperation and open communications, providing a resource of knowledge, experience and information, assisting contractors with implementing and maintaining safe work practices.

The strength of our organization rests on the commitment of our members who attend meetings regularly and participate in the life of the council by discussing safety issues and attending safety-related events. Through membership and actively practicing construction safety, MACSC Members have established personal credibility in the construction safety field. MACSC Members have both autonomy and the support of the employers whom they represent.

We aspire to be a positive influence in construction safety in the Mid-Atlantic Region by promoting and implementing accepted industry standards available through educational resources, oversight and ethics; your participation will greatly add to the collective knowledge of our council.
