Fall Protection

Join us for a **FREE 1-Day Working at Height Safety Blitz!** All attendees take part in Authorized Person Plus Training, in addition you will have to choose between Fall Protection Equipment Inspector Training or 3M Temporary Horizontal Lifeline Awareness Training for your second course.

Authorized Person Plus Training

A focus on best practices in fall protection and the need to protect workers at height highlights this informative training course. Participants are introduced to the legislation governing fall protection as well as the components of a fall protection system including body support, anchorages, connectors, and rescue. Upon successful completion of this course, the student will receive a certificate acknowledging they have met or exceeded OSHA and ANSI requirements as an Authorized Person.

Don't miss the break-out sessions included during the Authorized Person Plus Training course that will cover these topics:

- i. Leading Edge
- ii. Dropped Objects Prevention
- iii. And Much More

Fall Protection Equipment Inspector Training

This is a comprehensive inspection course which after completion will allow those responsible for the inspection of fall protection equipment to make educated decisions on whether the equipment can remain in service or should be removed from service. The training will also include standards and regulations, incorporating what they require and how they relate to the inspection process. Upon completion the student will receive a certificate recognizing that they have met the requirements of the OSHA and ANSI standards.

3M Temporary Horizontal Lifeline Awareness Training

This class will answer technical questions concerning who the Qualified Person is on temporary, pre-engineered horizontal lifelines. OSHA clearly states that it is the employer's responsibility to determine who the Qualified Person is based on their knowledge, training and experience. This course will train attendees on 3M's temporary horizontal lifelines as per OSHA 29 CFR 1926.32(m).

Space is limited and registration is required.
