◆ Safety Tech – Construction ◆

Seeking individuals with 1-3 years of experience in construction safety. If a candidate had experience in Refinery or Life Science / Pharma, that would be a plus. Working from project sites in Montgomery and Chester Counties.

ESSENTIAL FUNCTIONS:

- Provide leadership and establish a safety culture within the project.
- Conduct audits of the project site to verify compliance and identify unsafe conditions.
- Maintain documentation necessary to comply with the Site Safety Management Plan, OSHA and other applicable regulations.
- Create and implement written site safety management plans.
- Provide safety training.
- Work with field superintendent to enforce safety policies and procedures that help prevent accidents.
- Organize and conduct safety meetings and training.
- Manage the project safety committee; maintain minutes and status report for safety and other meetings and events.

QUALIFICATIONS

- BS/BA Degree in related field or any equivalent combination of education and experience
- 3+ years' experience in Construction industry
- OSHA 30 Hours Certification
- Strong computer skills Microsoft Office, Adobe XI Professional, and Outlook.
